

ROTATHOR™ Drehmoment BLDC Axial Flux Motor is poised to become a game-changer in the compact stator motors space. ARM's unique technology allows significant levels of torque generation within a compact body, and limitless power options based on its customizable, modular *Scalable Pancake* design.

It works underwater, has a long lifespan and it is easy, and cost-efficient to maintain and repair.

Product Specifications

SPECS

- Mark I: 18 cm Diameter, 6 cm Thickness (500w)
- Ideal for locations with limited available space
- Extended periods between maintenance times
- Fast and straightforward repair process
- Able to run underwater (Suitable for marine use)
- Long, cost-efficient total lifespan
- Scalable per preferred size and power (kw)
